Welcome!

Yocto Project Virtual Summit, Europe, 2020
Welcome to Yocto Project Virtual Summit 2020!

- Schedule and slides can be found here (including this one):
  - https://pretalx.com/yocto-project-summit-2020/schedule/
- Please mute your phone and turn off your video, thanks!
- Join our Slack channel to ask questions and get help (log in now!)
  - https://theyoctoproject.slack.com/ , #elce
- Thank you to all our volunteer expert speakers!
- Thank you to Linaro and LF for sponsoring the Zoom channels!
Class Details

- We are pleased to have such a high attendance! Here are some tips on how to help the class
  - Please make sure you are muted during the class when you are not asking a question
  - If you have a question to the speaker, please use the "Raise Hand" icon, and the host will see you and un-mute you
  - If you have a general question or comment, please feel free to use the Slack channel. Our experts are standing by!
  - For technical issues, we have "break-out" rooms to help you
Hands-on Computer Requirements

- Click to request a pre-configured virtual private server, if you have not already done so

- You will need SSH on your computer to connect to the provided class virtual accounts

- You should check your firewall settings to ensure that SSH will work

- If you have problems with the class instructions, first ask your question in the Slack channel so that people can share answers

- If you need more direct help, raise your hand and our host can temporarily move you to a Zoom breakout room with an expert, where you can share your screen
Yocto Project Ambassador: TAKAYASU ITO

- Teacher for Yocto Project hands-on training (Japan)
- Speaker at technical seminars (Japan)
- Committed to promoting Yocto Project in Japanese language.
- Embedded software developer since 2006 at Lineo Solutions
Thank you for joining us today!

Please also take a moment and fill out our online survey!

The link will be posted at the end of the conference.
