

Building a Low Powered Smart Appliance (class)

Michael Schloh von Bennewitz

<http://michael.schloh.com/>

Building a low powered smart app

Dear visitor, this presentation includes no slide deck because it is a workshop style hands-on session. Michael (the instructor) attends the needs of students by demonstrating live technology and carrying out steps one by one.

You can find more information at:

Building a low powered smart appliance

Thank you, Michael welcomes questions.
We'll be back with a IoT applied security
workshop at Black Hat:

<https://www.blackhat.com/us-17/training/analyzing-an-iot-empire.html>

...and possibly ELC Europe 2017.
