HTTP-FUSE KNOPIX Box

AIST: National Institute of Advanced Industrial Science and Technology

What is demonstrated

HTTP-FUSE KNOPIX Box is a server for PXE Boot and HTTP Proxy. It relay block files for virtual block device “HTTP-FUSE CLOOP”.

How was the Linux improved

Ext2Optimizer relocates data blocks to pack them into fewer block files of HTTP-FUSE CLOOP.

Original

Ext2Optimizer

Patch (Source Code) Availability

Hardware Information

HTTP-FUSE KNOPIX Box is based on L-Box (SH-4, 64MB Memory)
